

# Apor Vilmos Catholic College – Erasmus+ Course

---

**Course title: Magic and Fun Maths Activities**

**Credit: 2 ECTS**

**Course description:**

Children usually think that the mathematician or the math-teacher is a magician, a wizard who knows, understands lots of incomprehensible things. Maths can be difficult, solving lots of problems can be boring. So it is advisable for teachers to show a funny picture or a „miracle” or an interesting application to the children to maintain their interest, attention. We understand and apply the ancient Chinese proverb in teaching all subjects but mainly in teaching Mathematics: „Tell me, I will forget. Show me, I may remember. But involve me and I will understand.” The best way if we (teachers) use all the senses of the children in learning. To hear, to see, to do! In this course we show and discuss a lot of interesting activities, games, „miracles”, applications from all fields of Maths.
